

SUPPORTIVE/SUPPLEMENTARY MATERIAL

Supplemental File (Pituitary Worksheet)

145 probesets from the Affymetrix GeneChip[®] Rhesus Macaque Genome Array showing rhesus macaque pituitary genes with the potential to be differentially expressed based on filtering with Genesifter[™] and a 1.5 fold-change threshold (CON, n=3; CR, n=3).

Supplemental File (Testes Worksheet)

260 probesets from the Affymetrix GeneChip[®] Rhesus Macaque Genome Array showing rhesus macaque testicular genes with the potential to be differentially expressed based on filtering with Genesifter[™] and a 1.5 fold-change threshold (CON, n=3; CR, n=3).
